Nunavut Housing Needs Survey
Fact Sheet – Hall Beach

Background:

The Nunavut Housing Needs Survey (NHNS) is a survey of households in 25 communities in Nunavut, conducted from November 2009 to June 2010. The primary objective of the survey was to collect data on the housing needs of Nunavummiut so as to assist the Government of Nunavut in planning and providing housing. The overall response rate was 96% for Hall Beach.

This fact sheet presents some of the survey results for Hall Beach. Similar fact sheets are available for the territory as a whole and for each region and each community. All numbers in this fact sheet have been rounded. Percentages were calculated from unrounded numbers and the denominator excludes the non-response categories "refusal", "don't know", and "not stated".

More survey information and results are available on the Nunavut Bureau of Statistics' website which may be accessed at http://www.eia.gov.nu.ca/stats/housing.html or you may wish to contact one of our Information Officers at 867-473-2656 or 867-473-2660. Collect calls are accepted.

Survey highlights for Hall Beach:

Housing stock and housing tenure in Hall Beach:

A) Hall Beach had a total of 170 dwellings, of which 150 were occupied by their usual residents. The remaining 20 dwellings were unoccupied or occupied temporarily by persons who considered their usual home elsewhere.

B) The most common types of dwellings were single detached houses (62%) and row houses with 3 or more units side-by-side (23%).

C) Of the 150 dwellings occupied by usual residents, about 9 dwellings out of 10 were rented while approximately 1 out of 10 was owned.

D) Most of the housing occupied by residents of Hall Beach was classified as public housing, which made up slightly more than three-quarters of all occupied dwellings. The second most common type of housing was owner-occupied dwellings, representing about 1 dwelling out of 10. The remaining occupied dwellings were staff housing and other types of rented housing.

Fact Sheet – Hall Beach

State of housing for dwellings occupied by usual residents in Hall Beach:

E) Of the 150 households, which is the equivalent of all dwellings occupied by usual residents, slightly less than a half were satisfied with the condition of their dwelling.

F) About 62% of occupied dwellings (90) required major repairs for items such as defective plumbing or defective electrical wiring, a leaking oil or sewage tank, or a broken hot water boiler. The need for major repairs is based solely on the opinion of the respondent.

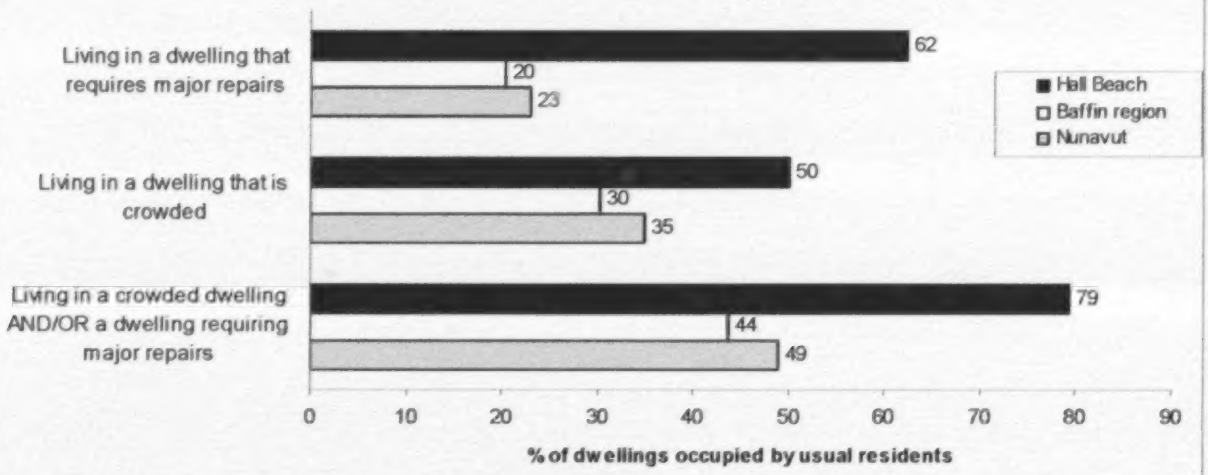
G) Approximately 50% of occupied dwellings (80) were classified as crowded, based on the lack of enough bedrooms. The majority of those dwellings (50 out of 80) were classified as crowded because they required one additional bedroom. The other crowded dwellings required two or more additional bedrooms.

H) In about 4 of the crowded dwellings out of 10, respondents indicated that they regularly used the living room for sleeping because there was no other place to sleep.

I) In Hall Beach, 79% of the occupied dwellings (120) were below housing standards, meaning they were either crowded or in need of major repairs or a combination of both. Housing affordability was not measured in the survey.

J) Owner-occupied dwellings and public housing had the highest proportion of dwellings below housing standards, about 85% for each type, compared with other types of housing such as staff housing or other rental housing.

Chart 1. Summary of the state of housing for dwellings occupied by usual residents, Hall Beach, Baffin region and Nunavut, 2009-2010



Note: The need for major repairs is based on the opinion of the respondent. A dwelling is classified as crowded if there is a lack of a sufficient number of bedrooms.

Nunavut Housing Needs Survey
Fact Sheet – Hall Beach

Hall Beach housing needs for dwellings below housing standards:

K) For each person in a household, the survey asked if they would move out if additional housing were available in their community.

L) In the majority of the occupied dwellings below housing standards (90 out of 120) in Hall Beach, at least one person or a group of household members would move out if more housing were available.

M) Out of the 600 or so persons living in a dwelling below housing standards, about 400 of them or two-thirds responded that they would move out if more housing units were available in their community.

N) Of the 400 people who would move out, some of them would move out on their own and others would move out with people living in the same dwelling or elsewhere. This represents a total of 110 groups of people that would move out of their current housing if additional housing were available.

O) This number of groups (110) represents the number of dwellings that would be required to house the groups moving out of dwellings below housing standards. About 23% of these groups wishing to move would be people moving out alone while 77% would be a group of two or more persons moving out together.

Nunavut Housing Needs Survey
Fact Sheet – Hall Beach

People in immediate need of housing in Hall Beach:

P) A very small number of people in Hall Beach did not have a usual home at the time of the survey and were living temporarily in another person's dwelling.

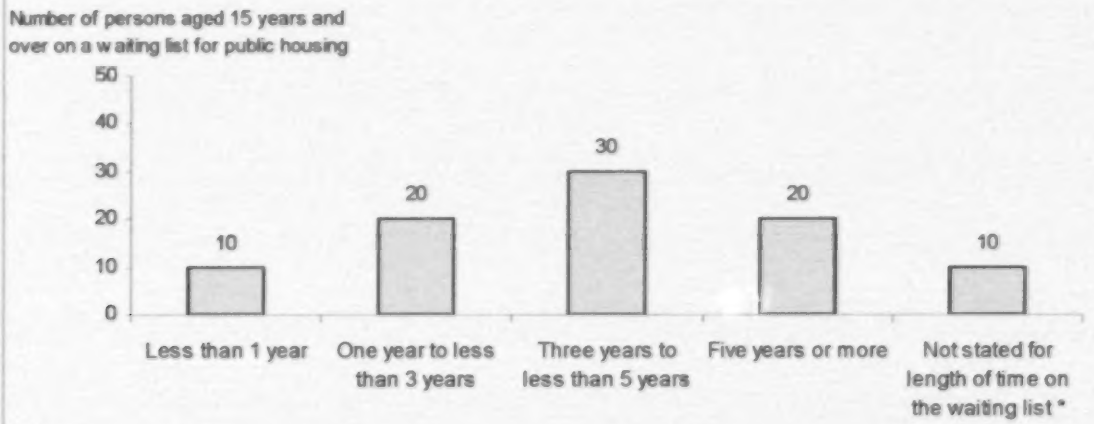
Q) About 3 occupied dwellings out of 10 housed temporary residents without a usual home elsewhere in the 12 months prior to the time of the survey.

People on the waiting list for public housing in Hall Beach:

R) About 90 people of Hall Beach aged 15 years and over reported that they were on the waiting list for public housing. This represents nearly 1 person out of 5 for those aged 15 and over.

S) For those on the waiting list, about 20 persons aged 15 and over reported being on the waiting list for at least one year but less than three years, while another 20 persons reported being on the waiting list for five years or more.

Chart 3. Number of persons aged 15 and over by length of time on a public housing waiting list, Hall Beach, 2009-2010



* Note: The data related to the length of time on the waiting list should be used with caution as this question is associated with a relatively large number of non-responses (don't know / refusal / not stated).

Telephone and Internet access in Hall Beach:

T) Approximately 80 households or half in Hall Beach had access to the Internet from within their dwelling.

U) The majority of households, or 82%, had a telephone. Most of these households had a regular land line telephone.
